-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 recites the limitation "said first planar section and said second planar section" in lines 2 and 3. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8-12, and 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Monteleone (3,721,507). Monteleone discloses a tip section assembly for a rotor blade comprising a tip spar section 44 comprising a first surface substantially parallel to a second surface and each surface extending from a shear web forming a C-shaped cross section where in the open side faces the leading edge of the rotor blade. The tip spar is mounted to the main blade spar and defines an anhedral relative to the main blade spar (See Figure 2) and is non-planar. It

should be noted that it is the position of the Examiner that the tip spar can be described as either C or U-shaped. There is also a non-structural tip skin mounted to the tip spar section.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Monteleone in view of Reinfelder et al. (5,320,494). Monteleone discloses all of the claimed subject matter except for the skin being a three-ply fiberglass lay-up.

Reinfelder et al. teach the skin of the tip portion of a rotor blade being manufactured of three layers of fiberglass fiber for durability. Since both Monteleone and Reinfelder et al. disclose tip spar sections having non-structural skin mounted to them, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the skin of Monteleone, with the teachings of Reinfelder et al., by manufacturing the skin as claimed for the purpose of improving durability of the tip portion skin.

## CONCLUSION

### *Allowable Subject Matter*

Claims 7 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
